### Summary

As of November 6, 2020, there have been 5,077 cases of COVID-19 reported on Guam. Seventy-three (73) new cases of COVID-19 were reported to DPHSS on November 5: 67 confirmed cases and six probable cases. Three COVID-19 cases were reported deceased since the last report: one on 10/21, one on 11/5 and one on 11/6.

New confirmed cases reported today: 36 cases tested positive at GPHL, 25 tested positive at DLS, three tested positive at GRMC, two tested positive at Guam Medical Care, and one tested positive at AMC.

New probable cases reported today: six cases tested positive by antigen testing: two at Central Medical Clinic, two at ExpressCare and two at IHP.

Thirty (30) cases were identified through contact tracing. Fifty-one (51) cases were reported released from isolation.

COVID-19 Cases Primary Reported Residence

| COVID-19 Testing on Guam** | Total  | New tests reported today | Percent positive |
|----------------------------|--------|--------------------------|------------------|
| COVID-19 Tests             | 71,311 | 638                      | 7.1%             |
| Molecular Tests            | 70,403 | 615                      | 7.1%             |
| Antigen Tests              | 699    | 22                       | 11.3%            |
| Serology Tests             | 209    | 1                        | 3.3%             |

\*\*See COVID-19 Testing Breakdown for all testing definitions. New tests reported reflects the number of tests reported to DPHSS since the previous report and does not necessarily indicate the number of samples run in the same time frame.

† Cases that test positive for COVID-19 through follow-up molecular testing return to active isolation.

§ Cases not in isolation indicates the number of COVID-19 cases that are no longer in active isolation based on criteria outlined on page 4. Generally, the criteria assess time since COVID-19 symptom resolution and the date of their most recent positive diagnostic test to qualify for release from isolation.

¶ In the 14 days before symptom onset. Some cases traveled to more than one country. \*\* Some cases have more than one link to other COVID-19 cases.

Total tests is defined as the number of tests with conclusive results not including follow-up testing for known COVID-19 cases. New tests reported today is defined as the total tests reported to DPHSS since the last Situation Report. Percent positive is defined as number of people with a positive test result, out of all people with COVID-19 testing. Total positives is defined as the number of people with a positive test result.

\*Two additional confirmed cases tested positive through molecular testing at an out-of-state laboratory.

\*\*Clinics included: American Medical Center, Guam Medical Care, Guam Radiology Consultants, and One Love Pediatrics.

\*\*\*Clinics included: Central Medical Clinic, ExpressCare, IHP Medical Group and Guam Medical Care.

## Guam COVID-19 Situation Report - 183 March 12–November 6, 2020

#### + Criteria for release from isolation

For persons with mild to moderate illness who are not severely immunocompromised:

For persons having symptoms: At least 3 days have passed since recovery defined as resolution of fever without the use of fever-reducing medications and improvement in respiratory symptoms (e.g., cough, shortness of breath) and any other symptoms attributed to COVID-19 AND at least 10 days have passed since symptoms first appeared—or since recurrent symptoms appeared—AND at least 10 days have passed since the date of their first (or most recent) positive COVID-19 diagnostic test.

For persons without symptoms: At least 10 days have passed since the date of their first (or most recent) positive COVID-19 diagnostic test assuming they have not subsequently developed symptoms since their positive test.

For persons with severe to critical illness or who are severely immunocompromised:

For persons having symptoms: At least 10 days have passed since symptoms first appeared, up to 20 days.

For persons without symptoms: At least 10 days have passed since the date of their first positive COVID-19 diagnostic test, up to 20 days.
